# ADVANS

## BIKE HOLDER FOR REAR LID

ADVANS holder is a collapsible platform mounted on the car using straps. The troughs for wheels ensure that the bike and transport is secure and mounting is fast. Product available in versions for 2 and 3 bicycles.

**Product features:**

- High versatility
- Strong, steel frame with diameter of 30 mm
- Construction painted using powder coating in silver metallic
- Possibility to raise the platform on the car
- Aluminium elements have been used to reduce weight
- Adjustable arms of the holder allow to adjust the construction to the shape of the car
- Hooks of straps covered with elastic coating that prevents scratches
- Convenient grips that immobilize bike frame
- B safety certificate
- Additional safety belt of 2,5 m
- Easy installation not requiring additional tools
